

Using Patient Preferences to Support Product Development and Value Communication

Regulators, payers, and prescribers are incorporating patient preferences into their decision making. Manufacturers are using patient preferences to inform evidence collection strategies and product design.

Understanding treatment value from the patient perspective

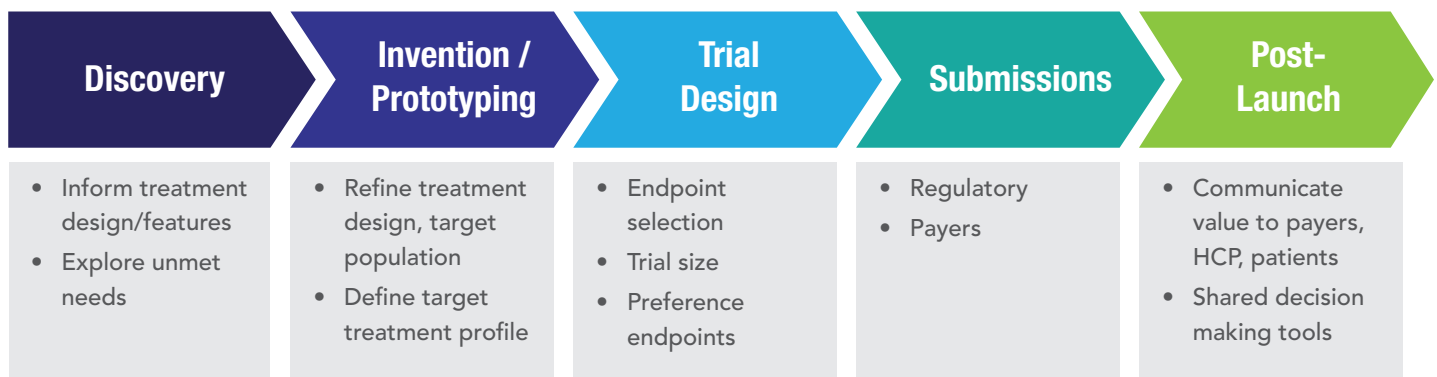

Generate decision relevant information

Meeting regulator and payer requirements

- The U.S. Food and Drug Administration (FDA) is encouraging manufacturers to include patient preference data in submissions and has issued guidance on how to collect patient preference data.
- In Europe, IMI PREFER¹ is exploring how to incorporate patient preferences into regulatory and payer decisions.
- In Germany, the Institute for Quality and Efficiency in Health Care (IQWiG) has recommended patient preferences be used to inform economic evaluation.
- In the UK, the National Institute for Health and Care Excellence (NICE) has provided scientific guidance on patient preference study design.

Inform internal and external decisions

Our Team & EXPERIENCE

— **15+** —

Years of experience in preference elicitation and benefit-risk assessment work

— **15+** —

Staff dedicated to conducting patient preference studies; one of the largest teams in the industry

— **70+** —

Peer-reviewed publications related to patient preference

— **Global** —

Experience implementing preference studies in North America, Europe, and Asia

Why EVIDERA?

— **Patient Recruitment** —

Expertise at recruiting patients to ensure representative samples

— **Regulatory** —

Regulatory experts with presence in front of FDA and EMA

— **Thought Leaders** —

Numerous industry leadership roles, e.g., ISPOR MCDA Task Force, ISPOR Stated Preference SIG; ISPE BRACE
