

OffTheShelf™

Historical patient chart data available in 48 hours

Part of the LiveTracker® product family

Fast access to existing syndicated patient charts across **ONCOLOGY** and **HEMATOLOGY**, from **40+ COUNTRIES** across **25+ INDICATIONS**

More than 100 de-identified data points collected for each patient

● **Patient data points include**

- Detailed patient profile
- Diagnosis history
- Biomarker testing
- Adjuvant/neoadjuvant therapy
- Complete line of therapy sequencing
- Treatment duration by line

● **Associated physician data**

- Physician caseload
- Drug usage
- Intention to prescribe
- Promotional exposure

Data can be used to answer **KEY PRODUCT-RELATED QUESTIONS**, including

- ✓ What are the current treatment patterns for my indication?
- ✓ Are there gaps within current guidelines?
- ✓ What products have recently launched and what is the uptake?

HIPAA and GDPR compliant data from healthcare provider electronic medical record (EMR) databases
