

LiveTracker[®]

Real-Time Global Treatment Trends

2.2M

global healthcare providers (HCPs) report real-world data and prescribing insights from EMRs and HCP behavioral information

Combines EMR data on the **WHAT** and **HOW** around treatment decisions with direct HCP input on **WHY** decisions are made

18
DAYS

average age of **real-time data** from monthly data refresh – provides the most up-to-date standard of care

Customizable dashboard puts **exactly what you want in front of you** to prioritize actionable insights

HIPAA + GDPR

compliant data

[recognized by scientific congresses and journals]

HIPAA = Health Insurance Portability and Accountability Act of 1996; GDPR = General Data Protection Regulation

Users supported with access to the **broader resources of Evidera and PPD** including:

- ✓ Biostatisticians
- ✓ Epidemiologists
- ✓ Clinical development experts
